

# Landform Analysis

Published by the University of Silesia  
and the Association of Polish Geomorphologists

## EDITORIAL BOARD

Prof. Dr. Andrzej Kostrzewski (Chairman), Adam Mickiewicz University, Poznań  
Prof. Dr. Adam Kotarba (Vice-Chairman), Polish Academy of Sciences, Kraków  
Prof. Dr. Stefan Kozarski, Adam Mickiewicz University, Poznań  
Dr. Andrzej Witt, Adam Mickiewicz University, Poznań  
Dr. Zbigniew Zwoliński, Adam Mickiewicz University, Poznań

## EDITORS

Chief Editor

Prof. Dr. Jacek Jania  
University of Silesia, Sosnowiec

Co-Editor

Prof. Dr. Wojciech Froehlich  
Polish Academy of Sciences, Kraków

Secretary

Dr. Iwona Morawiecka-Zacharz  
University of Silesia, Sosnowiec

Linguistic adviser

Dr. Peter Walsh, London

*This volume is sponsored by the State Committee for Scientific Research*

*Landform Analysis (Landf. Anal.)*  
The purpose of the *Landform Analysis* is to publish articles of high scientific  
or practical interest in any aspect of geomorphology.

Address of Editors  
Department of Geomorphology  
Faculty of Earth Sciences  
University of Silesia  
ul. Będzińska 60, PL 41-200 Sosnowiec  
Phone (+48-32) 291 70 86; Fax: (+48-32) 291 58 65  
e-mail: [jjania@us.edu.pl](mailto:jjania@us.edu.pl) and [iwonam@us.edu.pl](mailto:iwonam@us.edu.pl)

Orders should be addressed to  
Wydawnictwo Uniwersytetu Śląskiego (University of Silesia Press)  
ul. Bankowa 12B, PL 40-007 Katowice  
Fax: (48 32) 259 96 05, e-mail: [wydawus@us.edu.pl](mailto:wydawus@us.edu.pl)

First impression. Publishing sheets: 15,0. Printing sheets: 13,0 + 4 insertions

Printed by Czerny M. Firma Prywatna „Greg”. Zakład Poligraficzny  
ul. Poezji 18, 44-100 Gliwice

## LANDFORM ANALYSIS, Vol. 2, 1999

### CONTENTS

|                                                                                                                                                                                                         |     |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| <b>D. M. Hooper</b> – <i>Cinder movement experiments on scoria cones slopes: Rates and direction of transport</i> . . . . .                                                                             | 5   |
| <b>H. Klatkova</b> – <i>Morphological and geological evidence for glaciotectionics in the area of the Saalian Glaciation, with special reference to Middle Poland</i> . . . . .                         | 19  |
| <b>C. Bisci, S. Ciccacci, F. Dramis, B. Gentili, A. Kotarba</b> – <i>The extent of Pleistocene glaciations in the western part of the Campo Imperatore (Gran Sasso Massif, Central Italy)</i> . . . . . | 37  |
| <b>D. R. Butler, G. P. Malanson</b> – <i>Site locations and characteristics of miniature patterned ground, eastern Glacier National Park, Montana, U.S.A.</i> . . . . .                                 | 45  |
| <b>A. Olszewski, P. Weckwerth</b> – <i>Morphostructural zones of the Mýrdalsjökull ice cap and its main outlet glacier the Höfdabrekkujökull, Iceland</i> . . . . .                                     | 51  |
| <b>A. Olszewski, P. Weckwerth</b> – <i>The deformational structures of the deposits on the Höfdabrekkujökull forefield, Mýrdalsjökull, Iceland</i> . . . . .                                            | 63  |
| <b>G. F. Ufimtsev, A. I. Chestnov</b> – <i>The north-eastern boundary of the Baikal rift zone</i> . . . . .                                                                                             | 81  |
| The IV Congress of Polish Geomorphologists, Lublin 3–6 June 1998 . . . . .                                                                                                                              | 93  |
| Obituary – <i>Professor Halina Klatkova</i> . . . . .                                                                                                                                                   | 97  |
| Obituary – <i>Professor Jan Trembaczowski</i> . . . . .                                                                                                                                                 | 101 |
