Landform Analysis (Landf. Anal.)

The purpose of the *Landform Analysis* is to publish articles of high scientific or practical interest in any aspect of geomorphology

Address of Editors
Department of Geomorphology
Faculty of Earth Sciences
University of Silesia
ul. Będzińska 60, PL 41-200 Sosnowiec
Phone: (+48-32) 291 70 86; Fax: (+48-32) 291 58 65
e-mail: jjania@us.edu.pl and bpiwowar@wnoz.us.edu.pl

Orders should be addressed to
Wydawnictwo Uniwersytetu Śląskiego (University of Silesia Press)
ul. Bankowa 12B, PL 40-007 Katowice
Fax: (48 32) 259 96 05, e-mail: wydewus@us.edu.pl

First impression. Publishing sheets: 10,5. Printed sheets: 11,0.

Printed by Zakład Poligraficzny, ul. 75. Pułku Piechoty 1, 41-500 Chorzów

LANDFORM ANALYSIS, Vol. 3, 2002

CONTENTS

G. I. Ovchinnikov, Y. S. Maksimishina – The importance of geological-geomorphological factors in the development of abrasion processes on the coasts of the Bratsk Reservoir, in the SE part of Russia	5
T. Brzezińska-Wójcik – The dependence of relief on tectonics in the South-West Escarpment Zone of Tomaszowskie Równiny (SE Poland)	13
E. Smolska – The intensity of soil erosion in agricultural areas in North-Eastern Poland	25
D. R. Butler – The environmental impact of crayfish biopedoturbation on a floodplain: Roanoke River, North Carolina Coastal Plain, U.S.A.	35
A. Grešková – The application of the Geographic Information System and remote sensing in identification of the flooded and waterlogged areas	41
T. Szczepke, V. A. Snytko – The granulometric properties of contemporary aeolian sands in a taiga-steppe area of Eastern Siberia	47
Z. Klajnert – The distinctive shapes of some kame ridges in the Łódź region of Central Poland	63
M. Běl – The identification of neotectonics based on changes of valley floor width	77
