Information from the Executive Committee of the Association of Polish Geomorphologists

Dear Readers, Fellow Geomorphologists!

I am happy to present the next volume of Landform Analysis, a publication series of the Association of Polish Geomorphologists (APG). As you will see from the content, Landform Analysis has become truly international and provides a vehicle for the dissemination of scientific results from different fields of geomorphology and different geographical locations. The contributions presented in this volume deal mainly with fluvial and glacial geomorphology as well as structural geomorphology and coastal processes. They show regional case studies from Europe, Asia, North America and Africa. This proves international scope of Landform Analysis, which is one of the major points in the editorial policy. I would like to take this opportunity to thank members of the Editorial Board for their efforts to increase the quality of Landform Analysis. The voluntary contribution that each reviewer gives to the journal is also highly acknowledged.

> Wojciech Tylmann President of the Association of Polish Geomorphologists
