

## South America :: Chile

### Introduction :: Chile

#### Background:

Prior to the arrival of the Spanish in the 16th century, the Inca ruled northern Chile while the Mapuche inhabited central and southern Chile. Although Chile declared its independence in 1810, decisive victory over the Spanish was not achieved until 1818. In the War of the Pacific (1879-83), Chile defeated Peru and Bolivia and won its present northern regions. It was not until the 1880s that the Mapuche were brought under central government control. After a series of elected governments, the three-year-old Marxist government of Salvador ALLENDE was overthrown in 1973 by a military coup led by Augusto PINOCHET, who ruled until a freely elected president was inaugurated in 1990. Sound economic policies, maintained consistently since the 1980s, contributed to steady growth, reduced poverty rates by over half, and helped secure the country's commitment to democratic and representative government. Chile has increasingly assumed regional and international leadership roles befitting its status as a stable, democratic nation. In January 2014, Chile assumed a nonpermanent seat on the UN Security Council for the 2014-15 term.

#### **Demographic profile:**

Chile is in the advanced stages of demographic transition and is becoming an aging society - with fertility below replacement level, low mortality rates, and life expectancy on par with developed countries. Nevertheless, with its dependency ratio nearing its low point, Chile could benefit from its favorable age structure. It will need to keep its large working-age population productively employed, while preparing to provide for the needs of its growing proportion of elderly people, especially as women - the traditional caregivers - increasingly enter the workforce. Over the last two decades, Chile has made great strides in reducing its poverty rate, which is now lower than most Latin American countries. However, its severe income inequality ranks as the worst among members of the Organization for Economic Cooperation and Development. Unequal access to quality education perpetuates this uneven income distribution.

Chile has historically been a country of emigration but has slowly become more attractive to immigrants since transitioning to democracy in 1990 and improving its economic stability (other regional destinations have concurrently experienced deteriorating economic and political conditions). Most of Chile's small but growing foreign-born population consists of transplants from other Latin American countries, especially Peru.

## Economy :: Chile

---

### Economy - overview:

Chile has a market-oriented economy characterized by a high level of foreign trade and a reputation for strong financial institutions and sound policy that have given it the strongest sovereign bond rating in South America. Exports of goods and services account for approximately one-third of GDP, with commodities making up some three-quarters of total exports. Copper alone provides 19% of government revenue. From 2003 through 2013, real growth averaged almost 5% per year, despite the slight contraction in 2009 that resulted from the global financial crisis. Chile deepened its longstanding commitment to trade liberalization with the signing of a free trade agreement with the US, which took effect on 1 January 2004. Chile has 22 trade agreements covering 60 countries including agreements with the European Union, Mercosur, China, India, South Korea, and Mexico. Chile has joined the United States and nine other countries in negotiating the Trans-Pacific-Partnership trade agreement. The Chilean Government has generally followed a countercyclical fiscal policy, accumulating surpluses in sovereign wealth funds during periods of high copper prices and economic growth, and generally allowing deficit spending only during periods of low copper prices and growth. As of 31 December 2012, those

sovereign wealth funds - kept mostly outside the country and separate from Central Bank reserves - amounted to more than \$20.9 billion. Chile used these funds to finance fiscal stimulus packages during the 2009 economic downturn. In May 2010 Chile signed the OECD Convention, becoming the first South American country to join the OECD.

### **Transnational Issues :: Chile**

---

#### **Disputes - international:**

Chile and Peru rebuff Bolivia's reactivated claim to restore the Atacama corridor, ceded to Chile in 1884, but Chile has offered instead unrestricted but not sovereign maritime access through Chile to Bolivian natural gas; Chile rejects Peru's unilateral legislation to change its latitudinal maritime boundary with Chile to an equidistance line with a southwestern axis favoring Peru; in October 2007, Peru took its maritime complaint with Chile to the ICJ; territorial claim in Antarctica (Chilean Antarctic Territory) partially overlaps Argentine and British claims; the joint boundary commission, established by Chile and Argentina in 2001, has yet to map and demarcate the delimited boundary in the inhospitable Andean Southern Ice Field (Campo de Hielo Sur)

#### **Illicit drugs:**

transshipment country for cocaine destined for Europe and the region; some money laundering activity, especially through the Iquique Free Trade Zone; imported precursors passed on to Bolivia; domestic cocaine consumption is rising, making Chile a significant consumer of cocaine (2008)
