

Australia-Oceania :: New Caledonia
(self-governing territory of France)

Introduction :: New Caledonia

Background:

Settled by both Britain and France during the first half of the 19th century, the island became a French possession in 1853. It served as a penal colony for four decades after 1864. Agitation for independence during the 1980s and early 1990s ended in the 1998 Noumea Accord, which over a period of 15 to 20 years will transfer an increasing amount of governing responsibility from France to New Caledonia. The agreement also commits France to conduct a referendum between 2014 and 2018 to decide whether New Caledonia should assume full sovereignty and independence.

Economy:: New Caledonia

Economy - overview:

New Caledonia has about 25% of the world's known nickel reserves. Only a small amount of the land is suitable for cultivation, and food accounts for about 20% of imports. In addition to nickel, substantial financial support from France - equal to more than 15% of GDP - and tourism are keys to the health of the economy; during 2009-10, France sent more development assistance to New Caledonia than to any of its other overseas territories. Substantial new investment in the nickel industry, combined with the recovery of global nickel prices, brightens the economic outlook for the next several years.
